## Compostable...

**WHAT DOES IT MEAN?** Compostable products are biodegradable, but with an added benefit: when they break down, they release valuable nutrients into the soil, aiding the growth of trees and plants.

These products degrade within several months in our compost facilities without producing toxic residues.

Compostability is a desirable feature in traditionally-disposable products such as plates, bowls, cups, and cutlery. These products are commonly made out of sugarcane fibers or vegetable starch. It's important to use products clearly labeled "compostable."

**WHERE CAN I GET COMPOSTABLE PRODUCTS?** Three Rivers Park District can provide you with all the products you need for your event in our Green Gatherings facilities. Ask site staff or call our Reservations Office to make your purchase over the phone.
