

2019-20 WINTER SNOW PLOWING ON REGIONAL TRAILS

Winter maintenance and plowing is performed on over 100 miles of the Regional Trail System from November 15th and March 31st. This is achieved through coordination between Three Rivers Park District and local cities. Plowing response times will vary across the system and are dependent on local city plowing schedules and priorities. Please refer to the list below to find out which trails are maintained during the winter season.

For more information regarding plowing contact the Park District at 763-559-9000
